

Update for the City of Corinth

May 2015

Construction

- Deck placement for the new I-35E bridge that will travel over Corinth Parkway is set to begin at the end of May.
- Work widening the northbound U-turn at Swisher Road is scheduled for May. Lane closures will not be needed to perform this work.
- Work to remove the existing southbound frontage road between the North Denton/Lake Dallas Drive bridge and the new connector road linking Turbeville Road and the southbound frontage road is underway. Utility and prep work for the area south of this location will take place in May.
- Work has begun on the columns in the water for the new Lewisville Lake bridge. A drill shaft barge will be moved to the section of Lewisville Lake south of Highland Village Road in mid-May to begin work on the new Lewisville Lake bridge in that area.

Upcoming Traffic Alerts

- North and southbound I-35E mainlane traffic at McCormick Road will shift west in late May for work on the interstate bridge.
- North and southbound mainlane traffic will shift east in mid-May for rehabilitation work on the Mayhill Road bridge. Full nightly intersection closures at Mayhill Road will be in place through mid-June.
- There will be various nightly lane closures of the Loop 288 at I-35E for work beneath the bridge during the month of May.
- The north and southbound mainlanes between Loop 288 and Post Oak Drive will shift east and west onto the newly paved shoulder area by the end of the month.
