

STEPS FOR COMMERCIAL BACKFLOW TESTING

The state requires all commercial backflows to be tested annually. The City of Corinth has sent out the letter that you have received to notify you that it is due for testing. This is something that only has to be done once a year.

The City of Corinth has a list of approved backflow testers that you may contact to test your backflow. The tester is aware that they have to get the backflow testing form from the City of Corinth's permitting department. Once completed the customer needs to keep a copy of it for three years and return the original copy to the City of Corinth.

Here are some helpful steps after receiving the letter.

- Contact approved backflow tester, which you can choose one from the list below.
- Return testing form to City of Corinth and keep a copy for your records.
- The establishment has thirty days to submit form to City of Corinth

If you have any further questions, contact Chris Campbell in the Public Works Department at (940)498-3279 or (940)498-3271 For Code Enforcement
